PROFESSIONAL SUMMARY

ISTQB CTFL v4.0 certified Software Quality Engineer with nearly 3 years of hands-on experience in manual, API, database, performance, and automation testing across web and mobile applications. Experienced in Agile delivery, large-scale test case design, regression/exploratory testing, defect management, and release quality. Hands-on with Selenium, Katalon, Postman, JMeter, and SQL, with practical exposure to Playwright and Appium and developing TypeScript skills, plus foundational Spring Boot and networking knowledge.

TECHNICAL SKILLS

Testing: Manual (Web & Mobile), Functional, Regression, Exploratory, Smoke, API, Database, Performance, Test Case Design, Defect Reporting & Retesting

API & Performance: Postman, Swagger, Newman, JMeter

Automation: Selenium WebDriver, Katalon Studio, TestNG, Cucumber (BDD), Page Object Model (POM), Shift Engine

Additional Automation: Playwright (practical E2E experience), Appium (hands-on training)

Programming & Data: Java, JavaScript, SQL, HTML, PostgreSQL, SQLite | Basic: TypeScript | Familiar with: Python

Backend & Networking - Basic: Spring Boot, REST APIs, Client-Server Architecture, HTTP/HTTPS, IP/Ports/DNS, TCP/UDP/TLS, JPA/Hibernate, Spring Security

Tools & Delivery: Jira, Azure DevOps (TFS), Jenkins, Git/GitHub, Trello, IntelliJ IDEA, Agile, Scrum, SDLC/STLC

PROFESSIONAL EXPERIENCE

Software Quality Control Engineer - Istinara Solutions

Dec 2025 - Present

- Performed UI, API, and functional testing for websites and mobile applications, including manual testing; currently expanding automation coverage across both platforms.
- Designed and maintained 1,000+ test cases across multiple modules and business flows; executed test suites, documented defects, retested fixes, and collaborated with developers and product stakeholders on release quality.
- Conducted internal software testing knowledge-sharing sessions; completed backend training sessions and passed an internal assessment on backend fundamentals; participated in Agile ceremonies, requirement clarification, test planning, and cross-functional discussions.

Software Quality Control Engineer - URNT | Part-time | Remote

Nov 2025 - Present

Previous engagement: Jul 2024 - Dec 2024 | Full-time | Remote

- Performed manual, API, database, and exploratory testing across web, mobile, and admin platforms; executed 150+ test cases and identified defects affecting product stability and user flows.
- Tested payment gateways and fintech-related features; maintained regression coverage, retested fixes, and collaborated with developers and product stakeholders in Agile sprints.

Software QA Tester - ADVIS | Freelance / Part-time | Remote

May 2025 - Apr 2026

- Performed UI, API, automation, regression, and exploratory testing for web applications including an Admin Portal and integrated screens, covering 50+ test cases per release.
- Identified, documented, and tracked defects using Azure DevOps, verified fixes, and collaborated with the team in Agile sprints to support stable releases.

Software Quality Control Engineer Intern - ITWORX Education

Feb 2024 - Jul 2024

- Tested UI/APIs for web and mobile applications; designed 150+ test cases, executed 200+ regression tests, identified and logged defects using TFS, and automated stable modules using Katalon.

Freelance Software Testing Engineer - uTest

Oct 2023 - Jul 2024

- Tested web and mobile applications across different platforms and reported 10+ bugs to support product quality improvements.

SELECTED PROJECTS

URNT Platform - Website, Admin Panel & Mobile App | Professional Project

Tech: Manual, API, Database, Regression, Exploratory Testing

- Validated web, mobile, and admin workflows through API/data checks, regression testing, UI/UX validation, and Jira defect tracking.

SauceLab Web Automation Framework | Personal Project

Tech: Selenium WebDriver, Java, TestNG, Maven, POM | [GitHub Repository](#)

- Built an end-to-end UI automation framework using a maintainable Page Object Model structure.

REST API Testing Project | Personal Project

Tech: Postman, REST APIs, Assertions, Test Documentation | [GitHub Repository](#)

- Built a REST API testing project with Postman, test cases, bug reports, request validation, and assertions.

Demoblaze Performance Testing | Personal Project

Tech: JMeter, Performance Testing | [GitHub Repository](#)

- Designed JMeter scenarios to measure response behavior and load performance for Demoblaze.

TodoMVC E2E Automation | Personal Practice Project

Tech: Playwright, JavaScript, E2E Testing, Assertions | [Tested Website](#)

- Automated an end-to-end TodoMVC workflow covering task creation, completion, filtering, validation, and clearing completed items.

EDUCATION

Bachelor's Degree in Engineering - Science Valley Academy for Engineering & Technology | Sep 2014 - May 2019

Obour, Egypt

CERTIFICATIONS & TRAINING

- ISTQB CTFL v4.0 - ITIDA | Certificate Code: 250513005
- Selenium WebDriver with Java - Test Automation University | Jan 2024
- Manual Testing BootCamp - QAcart | Dec 2023
- Effective Test Case and Bug Report Writing Techniques - ITI Mahara-Tech | Nov 2023
